## PROFILE

Associate Degree Web Development student at Passerelles Numériques Cambodia (PNC) with hands-on experience in building full-stack web applications. Able to create user-friendly websites and develop server-side features using PHP/Laravel, JavaScript, and TypeScript. Familiar with using Git, Docker, AWS, and testing APIs with Postman. A motivated learner who works well in a team and aims to deliver reliable and high-quality web systems.

## PERSONAL DETAILS

- Name : Sreynich Chhoeurn
- Gender : Female
- Date of birth : 22<sup>nd</sup> August 2005
- Place of birth : Pursat Province
- Nationality : Khmer
- Marital status : Single

## EXPERIENCE & PROJECTS

### Open Development Cambodia (ODC) – Web Development Intern

**Project:** cambodiaigf.kh Website | **Role:** Full Stack Developer

**Date:** 22 Oct 2025 – 4 Dec 2025

**Technologies:** HTML, CSS, Tailwind CSS, JavaScript, PHP/Laravel, WordPress, GitHub, Figma

- Developed responsive and interactive web pages, including Home page with live countdown and Partner page with animated logos.
- Integrated frontend components with backend CMS (WordPress/Laravel) for dynamic content updates.
- Collaborated with team members to identify and resolve website issues, improving performance and user experience.
- Maintained high code quality through documentation, version control

### Virtual Company 2 (VC2) – QR Code Menu App

**Role:** Flutter Mobile Developer | **Date:** 21 Jun 2025 – 29 Aug 2025

**Technologies:** Flutter, Laravel, MySQL

- Built a mobile app for digital menus with real-time backend integration and multi-language support.
- Enhanced app performance and user experience through bug fixes and feature improvements.
- Worked closely with the team to plan, develop, and deliver features on schedule.

### Virtual Company 1 (VC1) – POS System

**Role:** Full-Stack Developer | **Date:** 25 Feb – 02 May 2025

**Technologies:** PHP (MVC), MySQL, HTML, CSS, JavaScript, AWS

- Designed and implemented a POS system with real-time inventory and sales tracking.
- Developed RESTful APIs and ensured database integrity using PHP (MVC) and MySQL.
- Conducted testing and debugging to ensure smooth backend operations.

## DEVELOPMENT TOOLS

---

- GitHub
- AWS EC2
- Postman
- WordPress
- Netlify / Vercel
- Linux (Ubuntu)
- Docker (basic – database & local environment)

## TESTING SKILLS

---

- API Testing with Postman
- Bug Reporting (Jira, GitHub Board)
- Basic STLC & Test Case Writing

## SOFT SKILLS

---

- Problem-Solving
- Research
- Responsibility & Commitment
- Adaptability & Willingness to Learn
- Team Collaboration
- Clear Communication

## LANGUAGES

---

- Khmer: Native
- English: Intermediate

## INTERESTS

---

- Coding & Programming
- Web & UI/UX Design
- Learning New Technologies
- Problem-Solving & Research
- Collaboration & Volunteering

### Cloud Hosting – WordPress Deployment

**Role :** DevOps (Solo Project) | **Date :** 12 Jan – 26 Jan 2025

**Technologies :** AWS, Linux Ubuntu, MobaXterm, WordPress

- Deployed and configured WordPress on AWS EC2 with Linux Ubuntu, ensuring server reliability and performance.
- Managed DNS, server environment, and system optimization to improve website uptime.

### Weather App

**Role :** Front-End Developer | **Date :** 12 Jan – 26 Jan 2025

**Technologies :** JavaScript, HTML/CSS, Weather API

- Developed a responsive web application displaying live weather data via API.
- Used JavaScript and custom styles to make the app interactive and user-friendly.
- Helped with app deployment and tested it on different screen sizes to ensure usability.

### Web Design

**Role :** Team Leader & Front-End Developer | **Date :** 21 Sep – 04 Nov 2024

**Technologies :** HTML, CSS (SASS), Figma, GitHub, Netlify

- Led a team in planning and developing a responsive user interface, ensuring smooth user experience across devices.
- Managed project collaboration using Git GitHub for version control and updates.
- Deployed the final design on Netlify for public access
- Coordinated team tasks to meet deadlines and maintain high-quality deliverables.

### Portfolio Website

**Role :** Vibe Coder | Personal Project

**Technologies :** ChatGPT, Bolt

- Enhanced content clarity and engagement by leveraging ChatGPT for interactive text.
- Developed and organized website content efficiently using the Bolt platform, improving navigation and usability.
- Created a user-friendly portfolio showcasing skills and projects.
